On going Project

Education

- **B.Tech** in Electrical and Electronics Engineering.
Veer Surendra Sai University of Technology, Burla.
08/2019 – Present
- CGPA: 8.97
- **Intermediate** (12th)
Deepika English Medium School, Rourkela.
05/2017 – 06/2019
- CBSE
- 89.4%
- **Matriculation** (10th)
• **Deepika English Medium School, Rourkela.**
05/2017
- CBSE
- 95%

Certifications

- Matlab – Coursera
- Web Development – Coursera
- Python and OOPS – Progate

Organizations

- **Robotics Society : Where imagination meets Innovation**
Technical Team Member

Languages

- English
- Hindi
- Odiya

Interest

- Robotics
- Core Engineering practices
- Learning new Technologies
- Youtube

Work/Volunteer Experience

- **Project and Event Manager**
VSSUT Robotics Society, Burla (09/2020 – 01/2023)
Achievement / Task:
 - organized several workshops, webinar and competitions.
 - Worked on various projects like 3d Printer, 3d Scanner, ROUV etc.
 - Managed all the club Activities including the promotions, expanding the connections, collaborating with startups and many more.
- **Teacher On Electronic Projects**
Robocamp, VSSUT, Burla. (05/2021 – 06/2021)
Achievement / Task:
 - Taught more than 40 students Arduino, C/C++, UAVs.
 - Worked as a mentor to help the student in developing their school projects.

Personal Projects

- **3D Printer**
 - Developed and working on upgrades of a 3D printer.
 - Dual Extruder upgrade is successfully incorporated.
 - Used the .STL files from Solidworks or any other 3D object designing software and Then the file is converted to compatible GCode file using Slicer.
- **UAV**
 - Developed a fully Stable Quadcopter
 - Equipped With the Telemetry, GPS modules and Pixhawk Flight Controller.
- **Maze Solving Bot**
 - Developed A Maze Solving bot using Arduino, L298 Motor Driver, IR sensor array etc.
 - The Bot starts at any point of line Maze and reaches to the End Point.
 - After That It Returns To the Starting Point Following The Shortest Path.
- **3D Scanner**
 - Developed and working on 3D scanner.
 - Initial Development was using the Kinect Scanner.
 - Used Meshroom and 3DF Zephyr for Photogrammetry.
 - Implementing Garmin Lidar V3hp and testing for point cloud generation and better result.
- **Smart Cart**
 - Capable of Scanning product's QR code and preparing a sum total bill after fetching data from the inventory
- **Various Python Projects**

Skills

C	C++	Java (Basics)	Python	HTML	CSS	Arduino
Adobe Photoshop	React	JavaScript	Android Studio	MATLAB		
Adobe Premier Pro	OOPS	Eagle Cad	MS Office	Proteus	SQL	

Achievements

- **Runner up at Maze Solving Competition at Wissenaire 2k19**
(Tech Fest of IIT Bhubaneshwar)
- **Awarded 1st prize in Deep Tech Ideathon 2021**
(Hackathon from Mouser Electronics And Applied Singularity)

Soft Skills

- Leadership • Multitask • Time Management • Problem Solving
